How to...

Step 5

Find a weight that is precise, like bags of **feedstuff**, that you are certain about.

Note! CowConnect recommends no less than 100 kilos, preferably 500 kilos, to get the most accurate result.

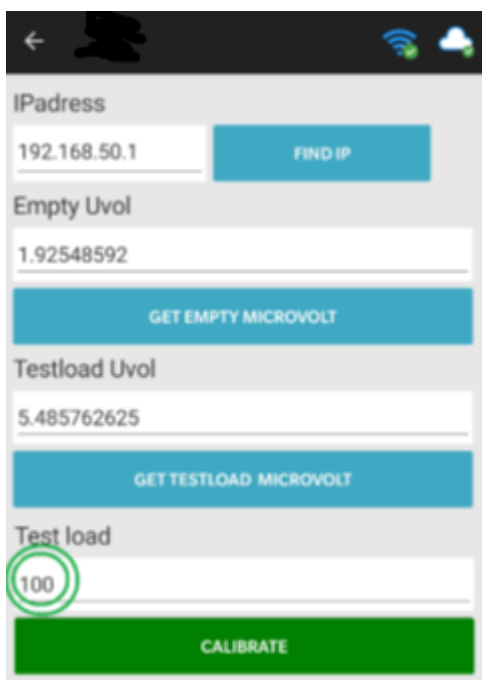

Enter that weight under "Test Load" before putting in the weight.

Step 6

Now load the weight with the bags, so the weight is the same as the "Test Load" you just entered.

Step 7

Then press "Get Testload Microvolt". Make sure that a number appears under "Testload Uvol"

The screenshot shows the CowConnect mobile app interface. At the top, there is a status bar with a back arrow, a profile icon, and signal/battery icons. The app has several input fields and buttons:

- IPaddress**: A text input field containing "192.168.50.1" and a blue button labeled "FIND IP".
- Empty Uvol**: A text input field containing "1.92548592" and a blue button labeled "GET EMPTY MICROVOLT".
- Testload Uvol**: A text input field containing "5.485762625" and a blue button labeled "GET TESTLOAD MICROVOLT".
- Test load**: A text input field containing "100", which is circled in green. Below it is a large green button labeled "CALIBRATE".
