

# How to add an operator on mobile devices?

Please note, to be able to choose an operator, you need to have more than one operator registered in the system.

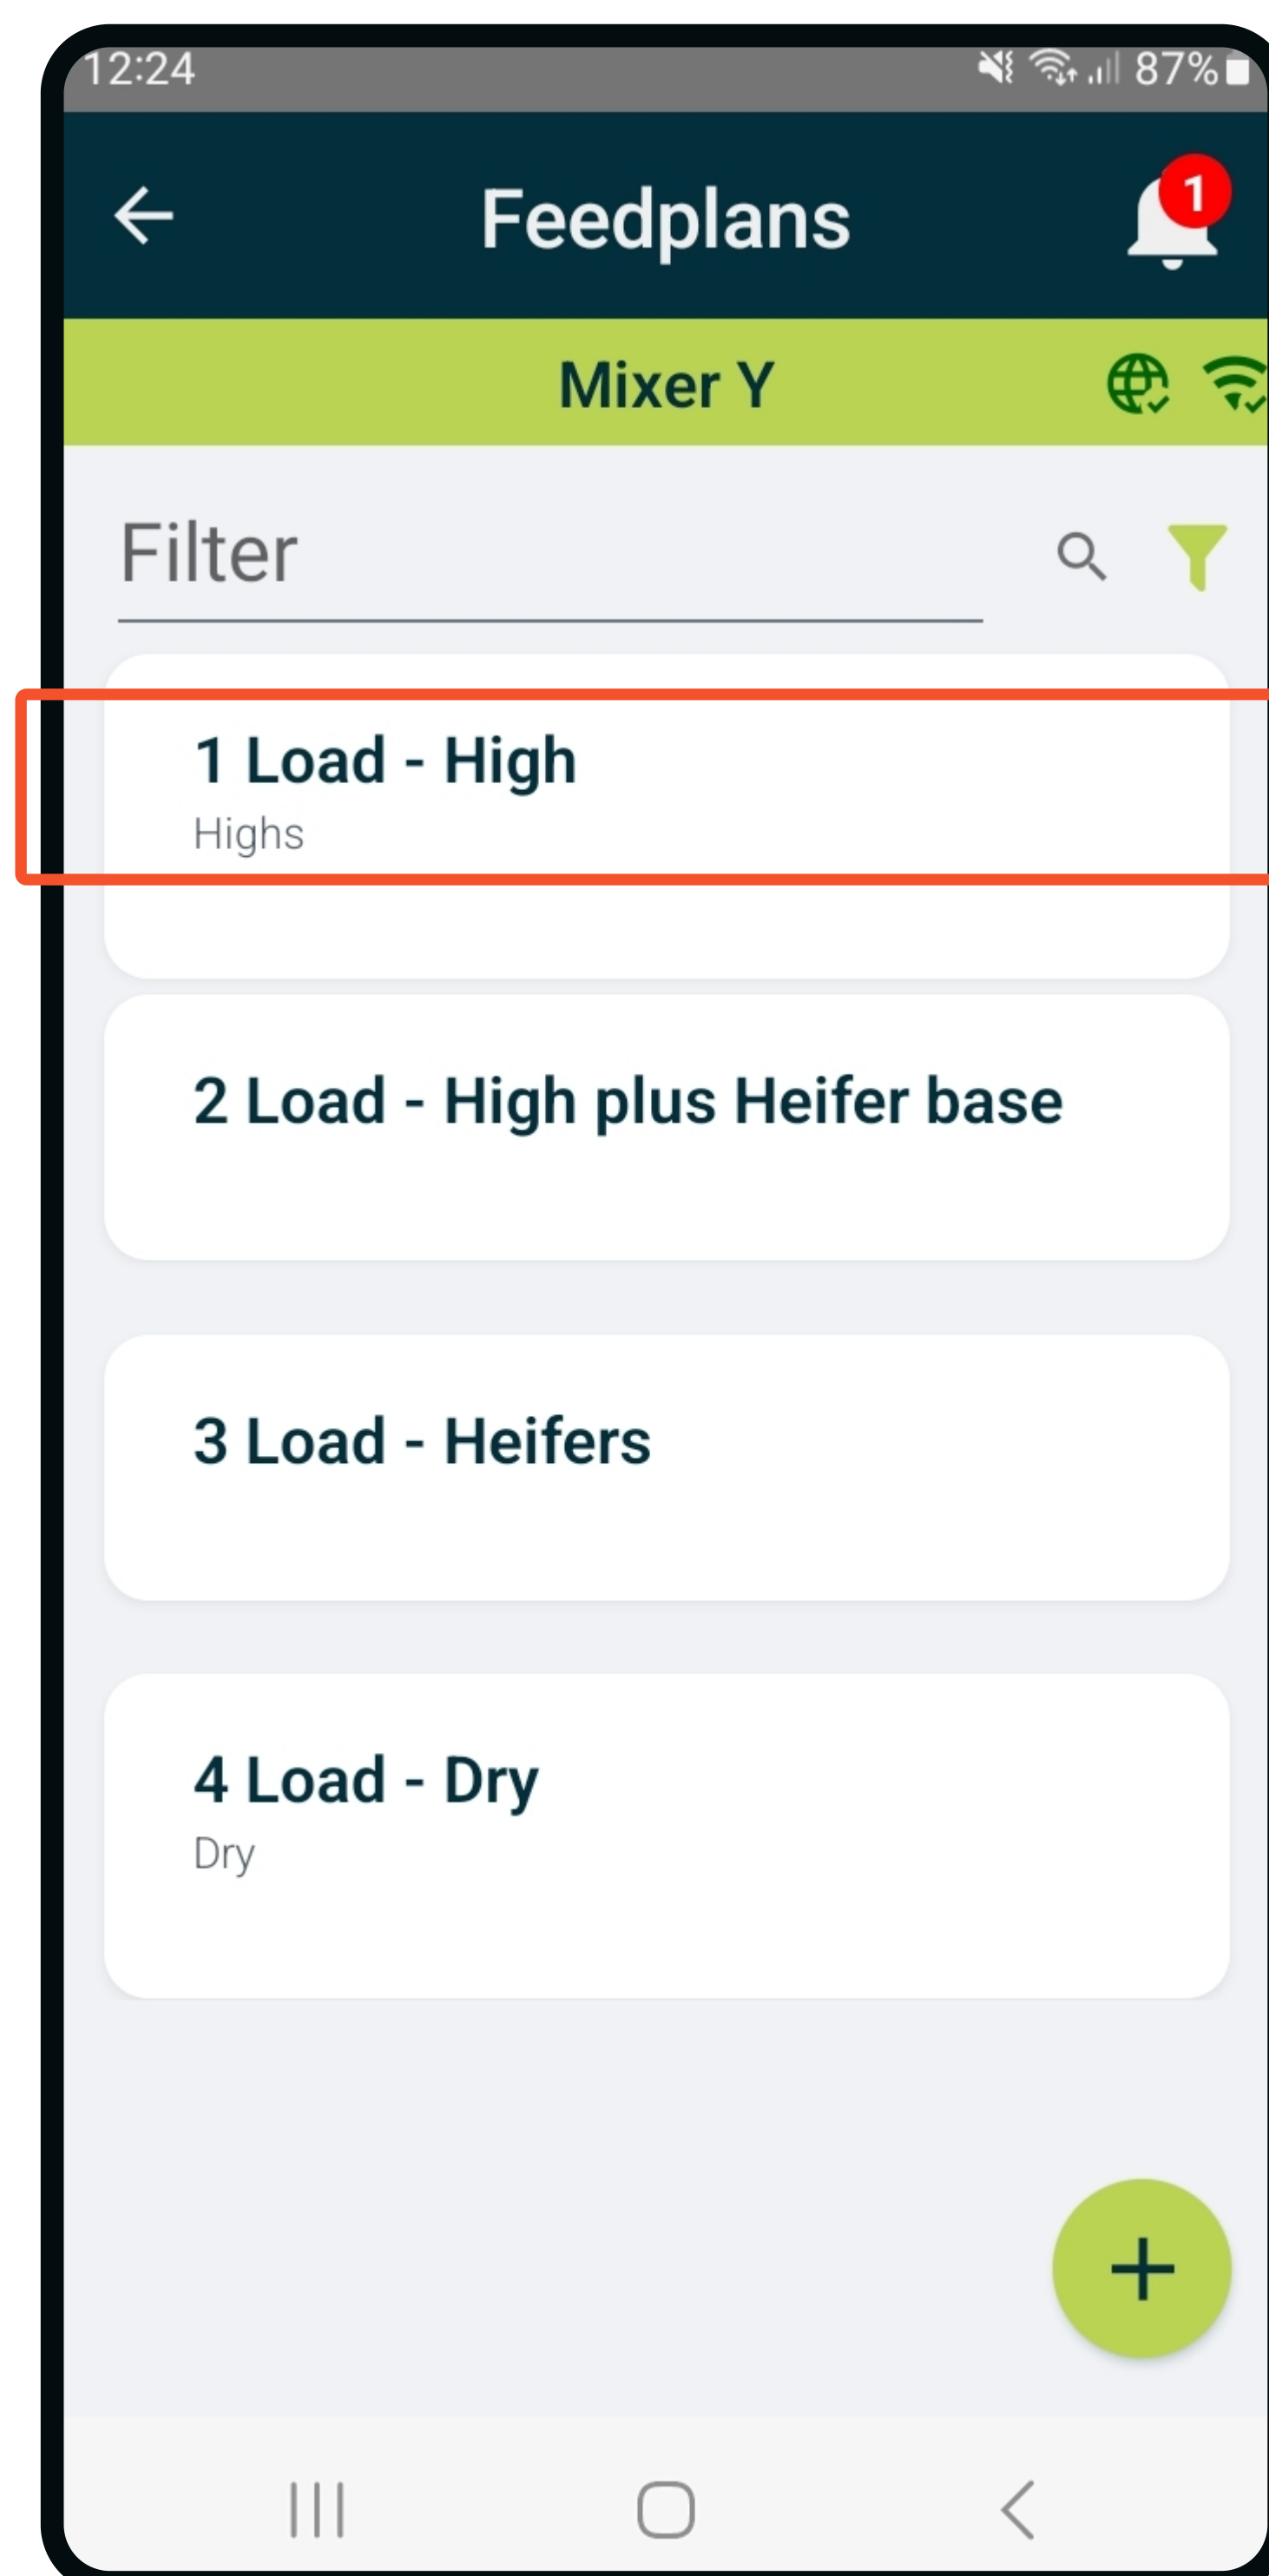

1. Log into Feedlync, using your credentials.

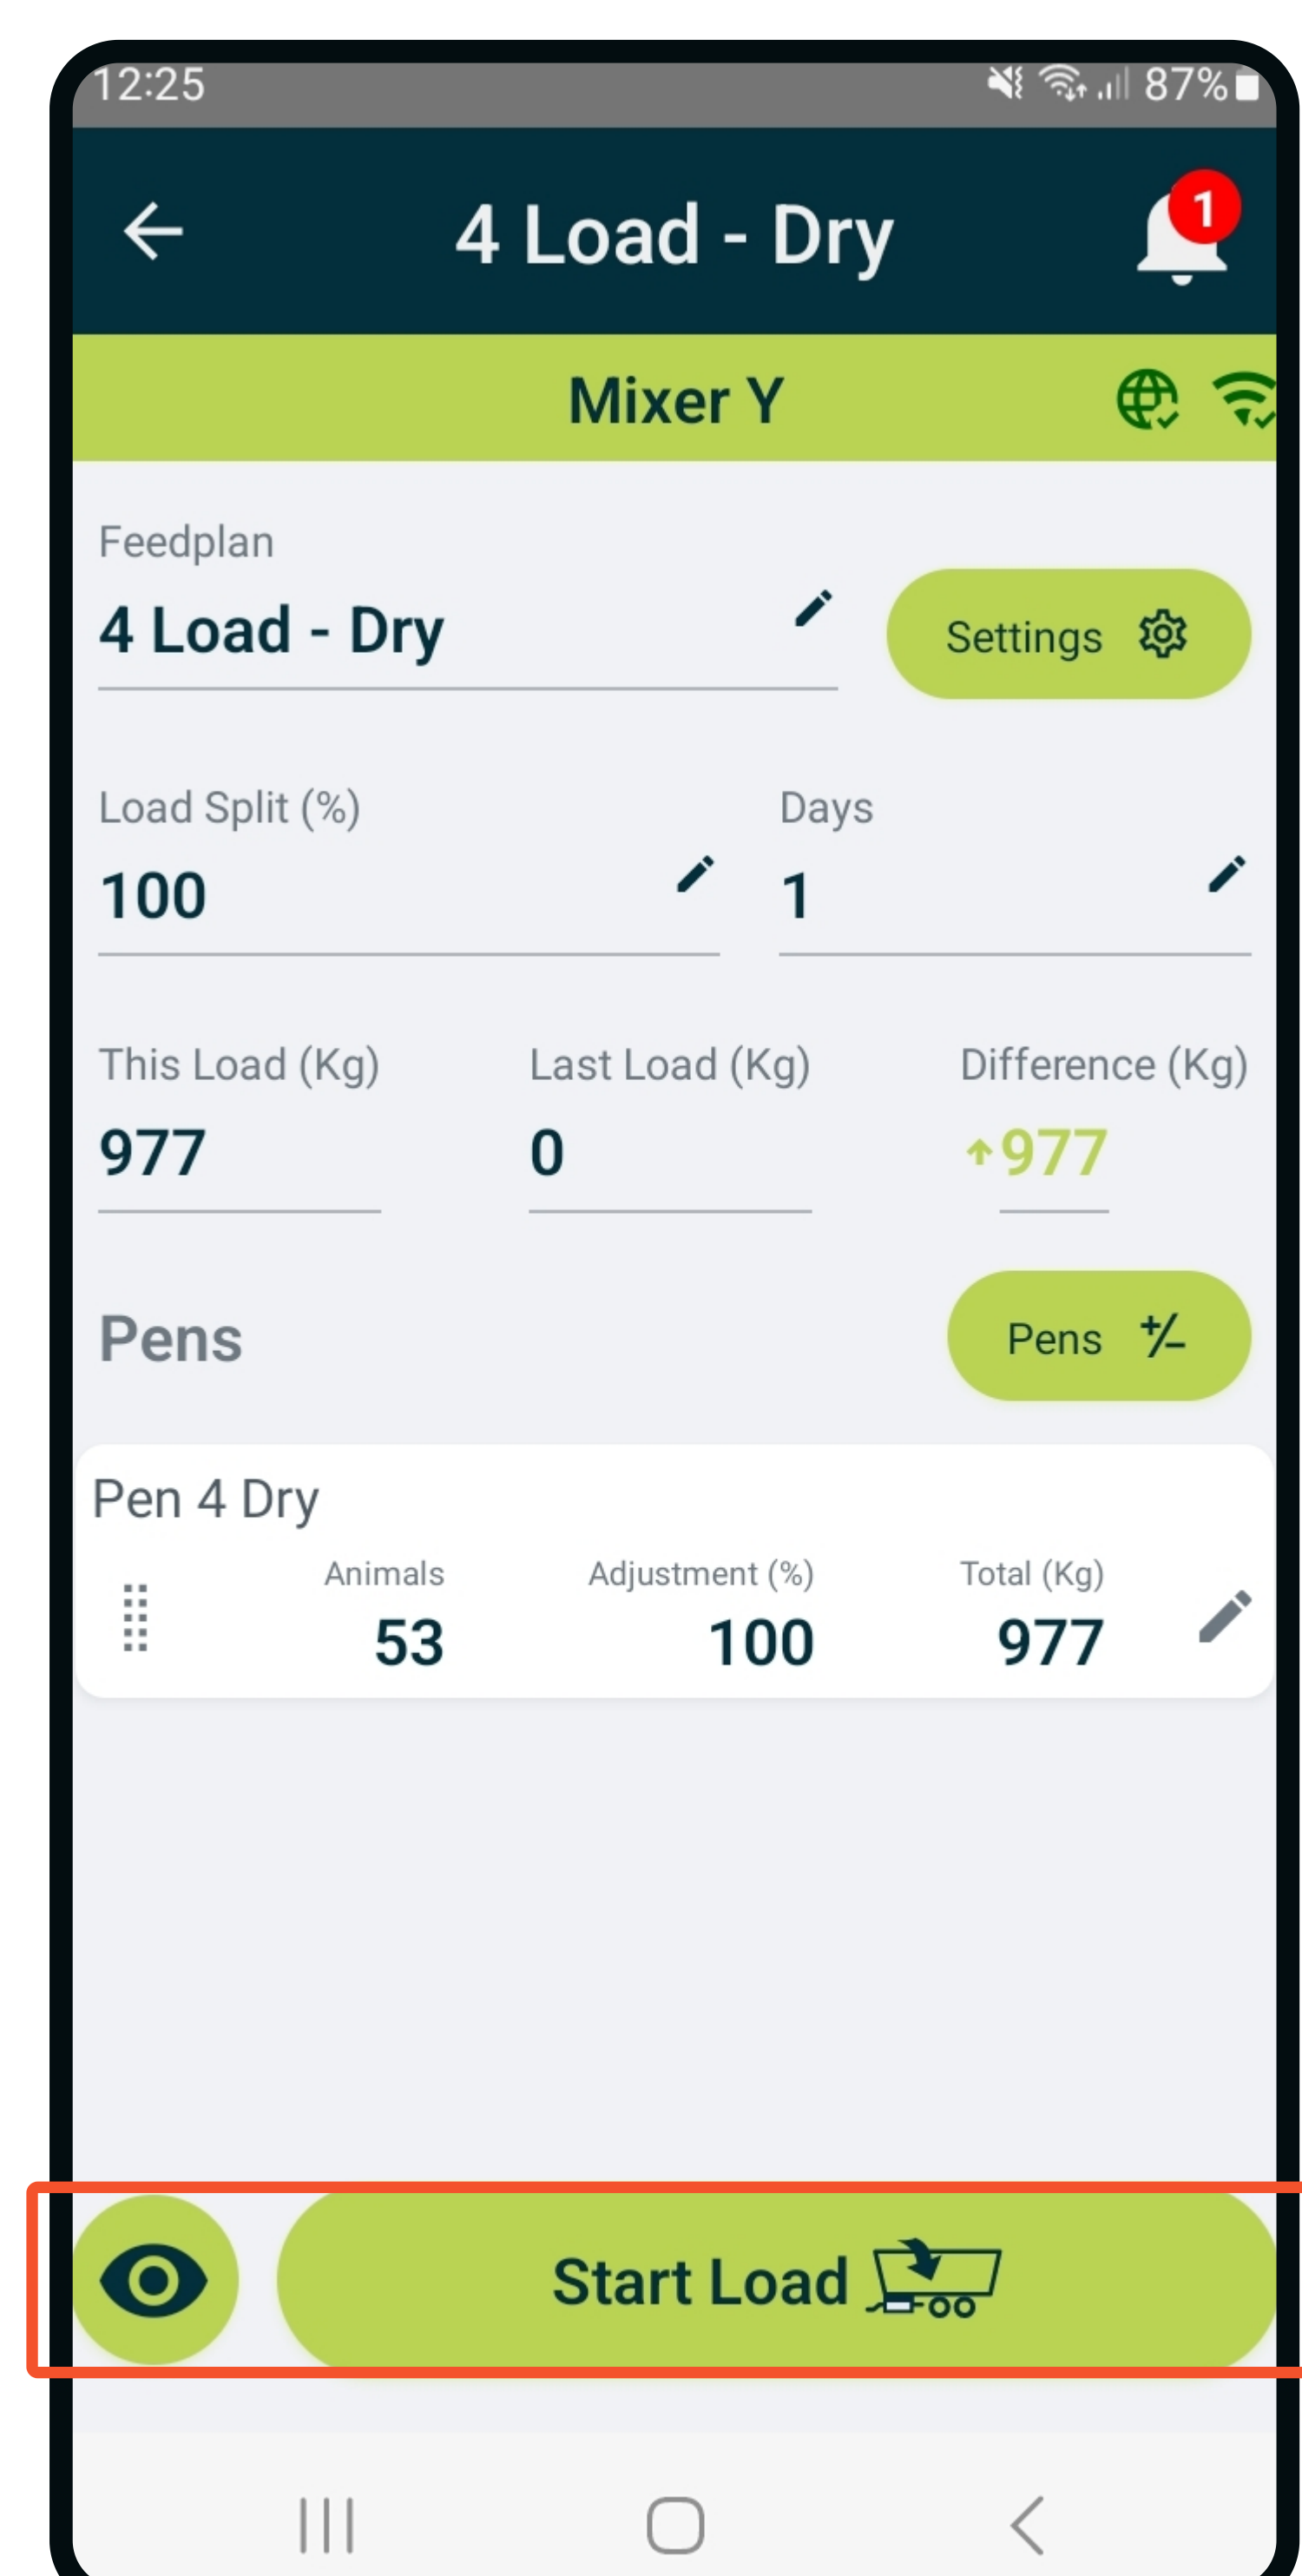

2. Select for Feed Plans.

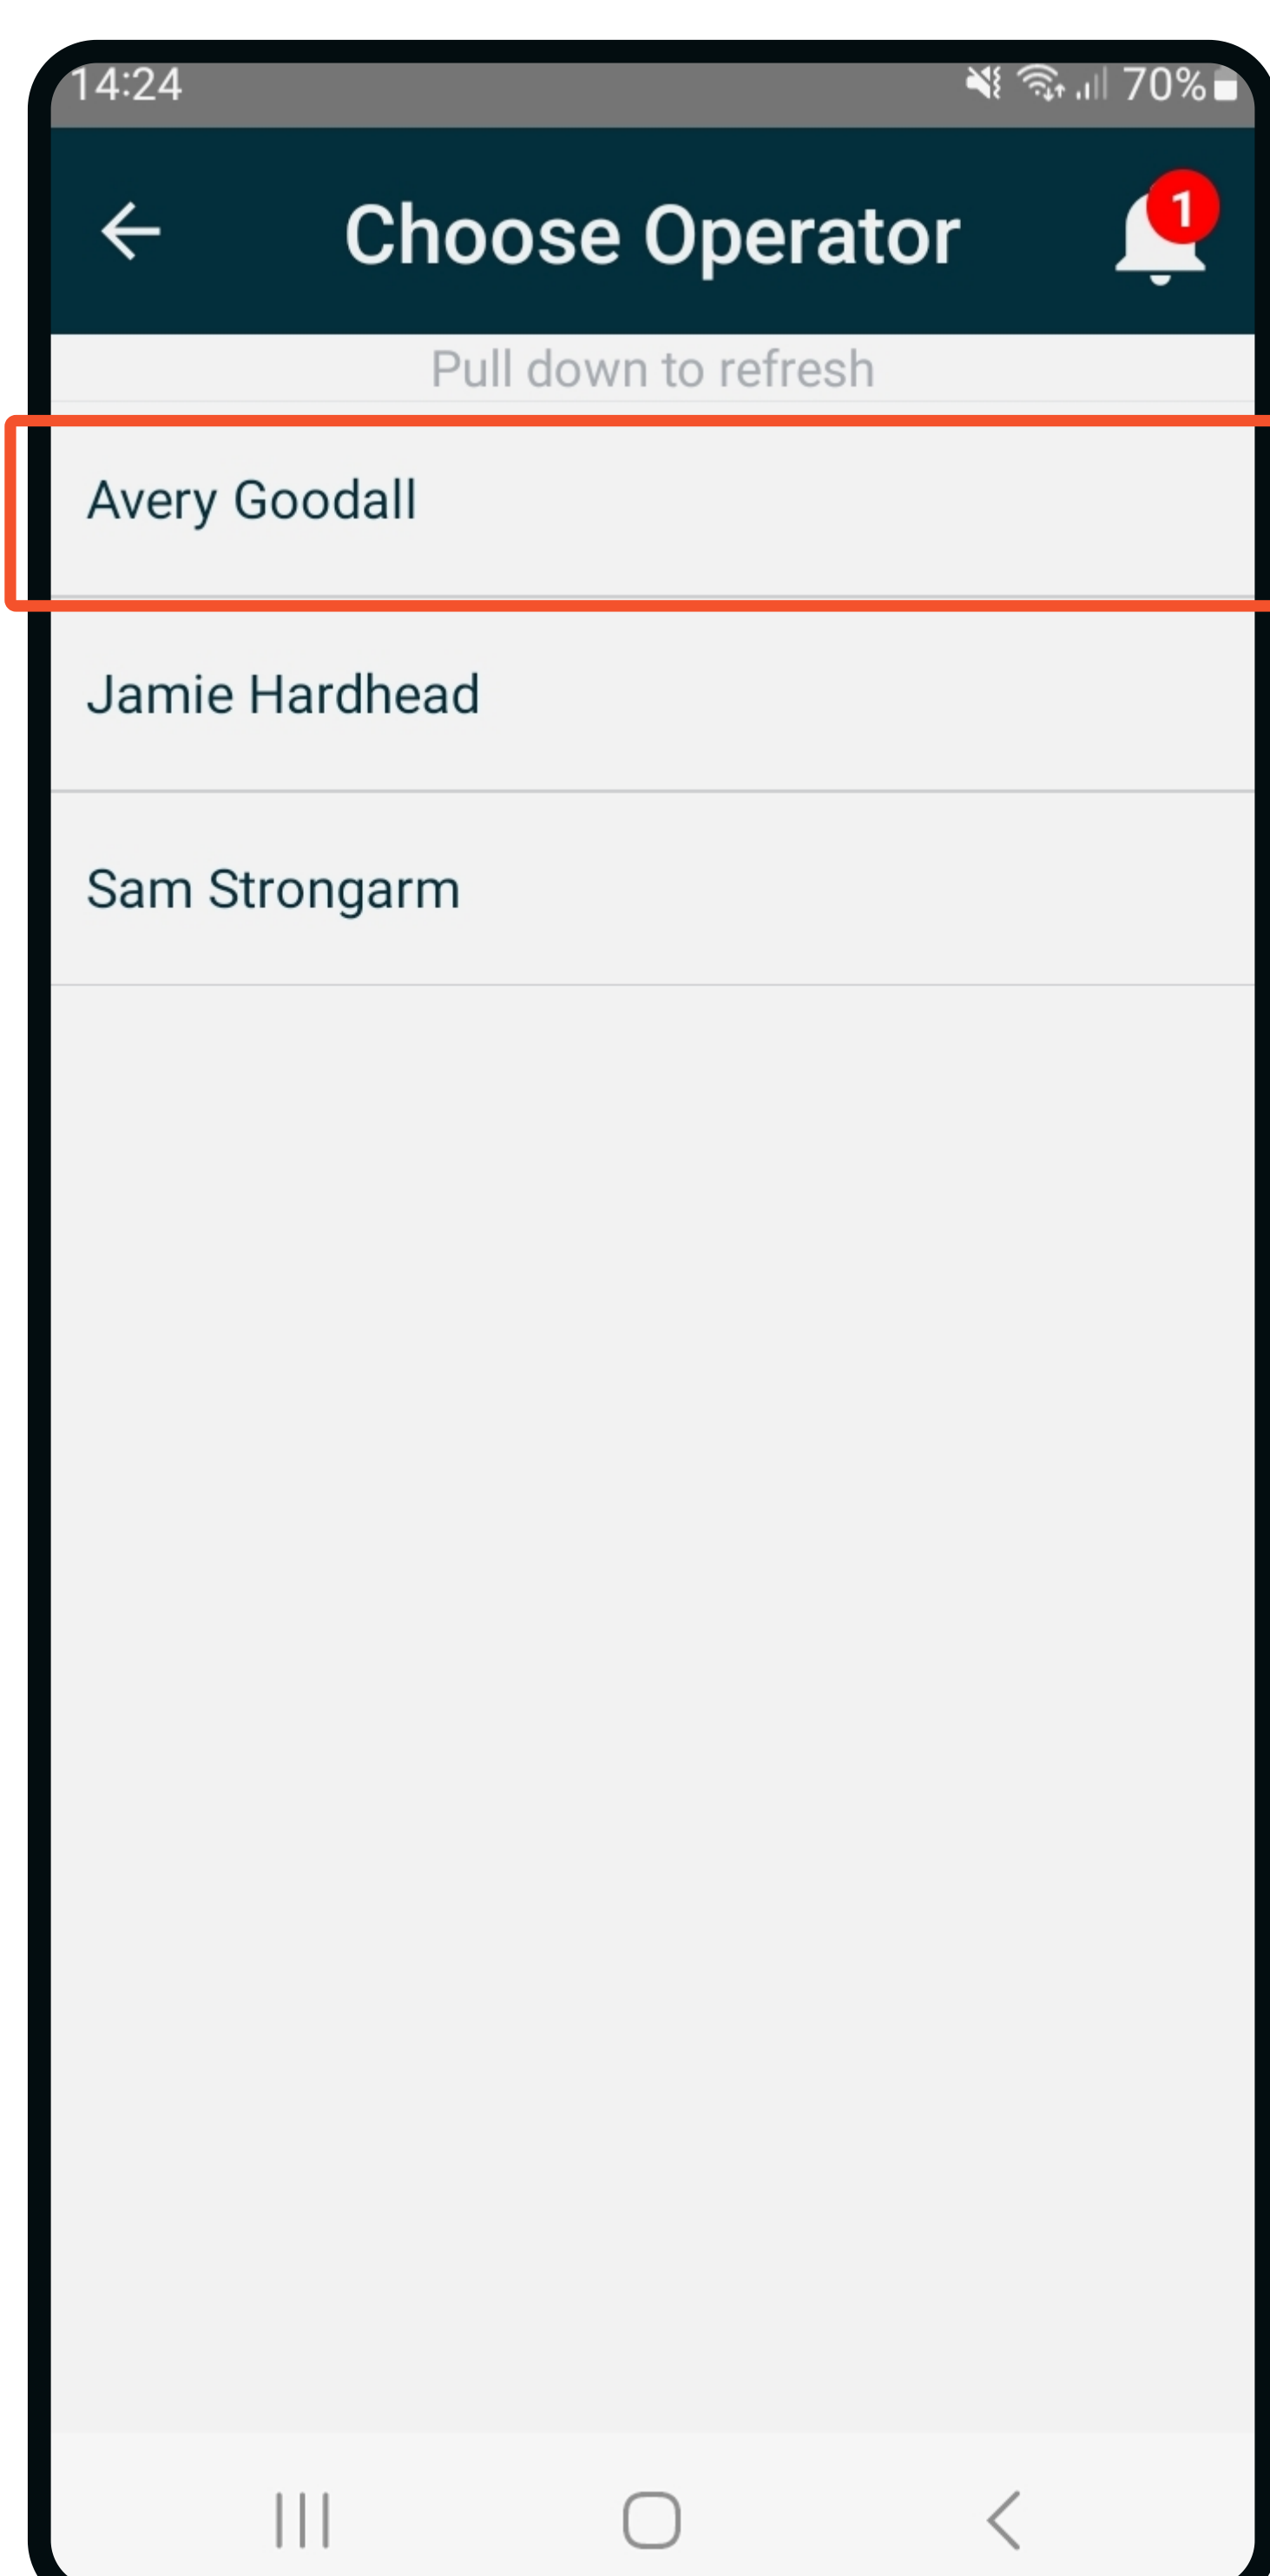

3. Pick the feedplan you would like to mix.

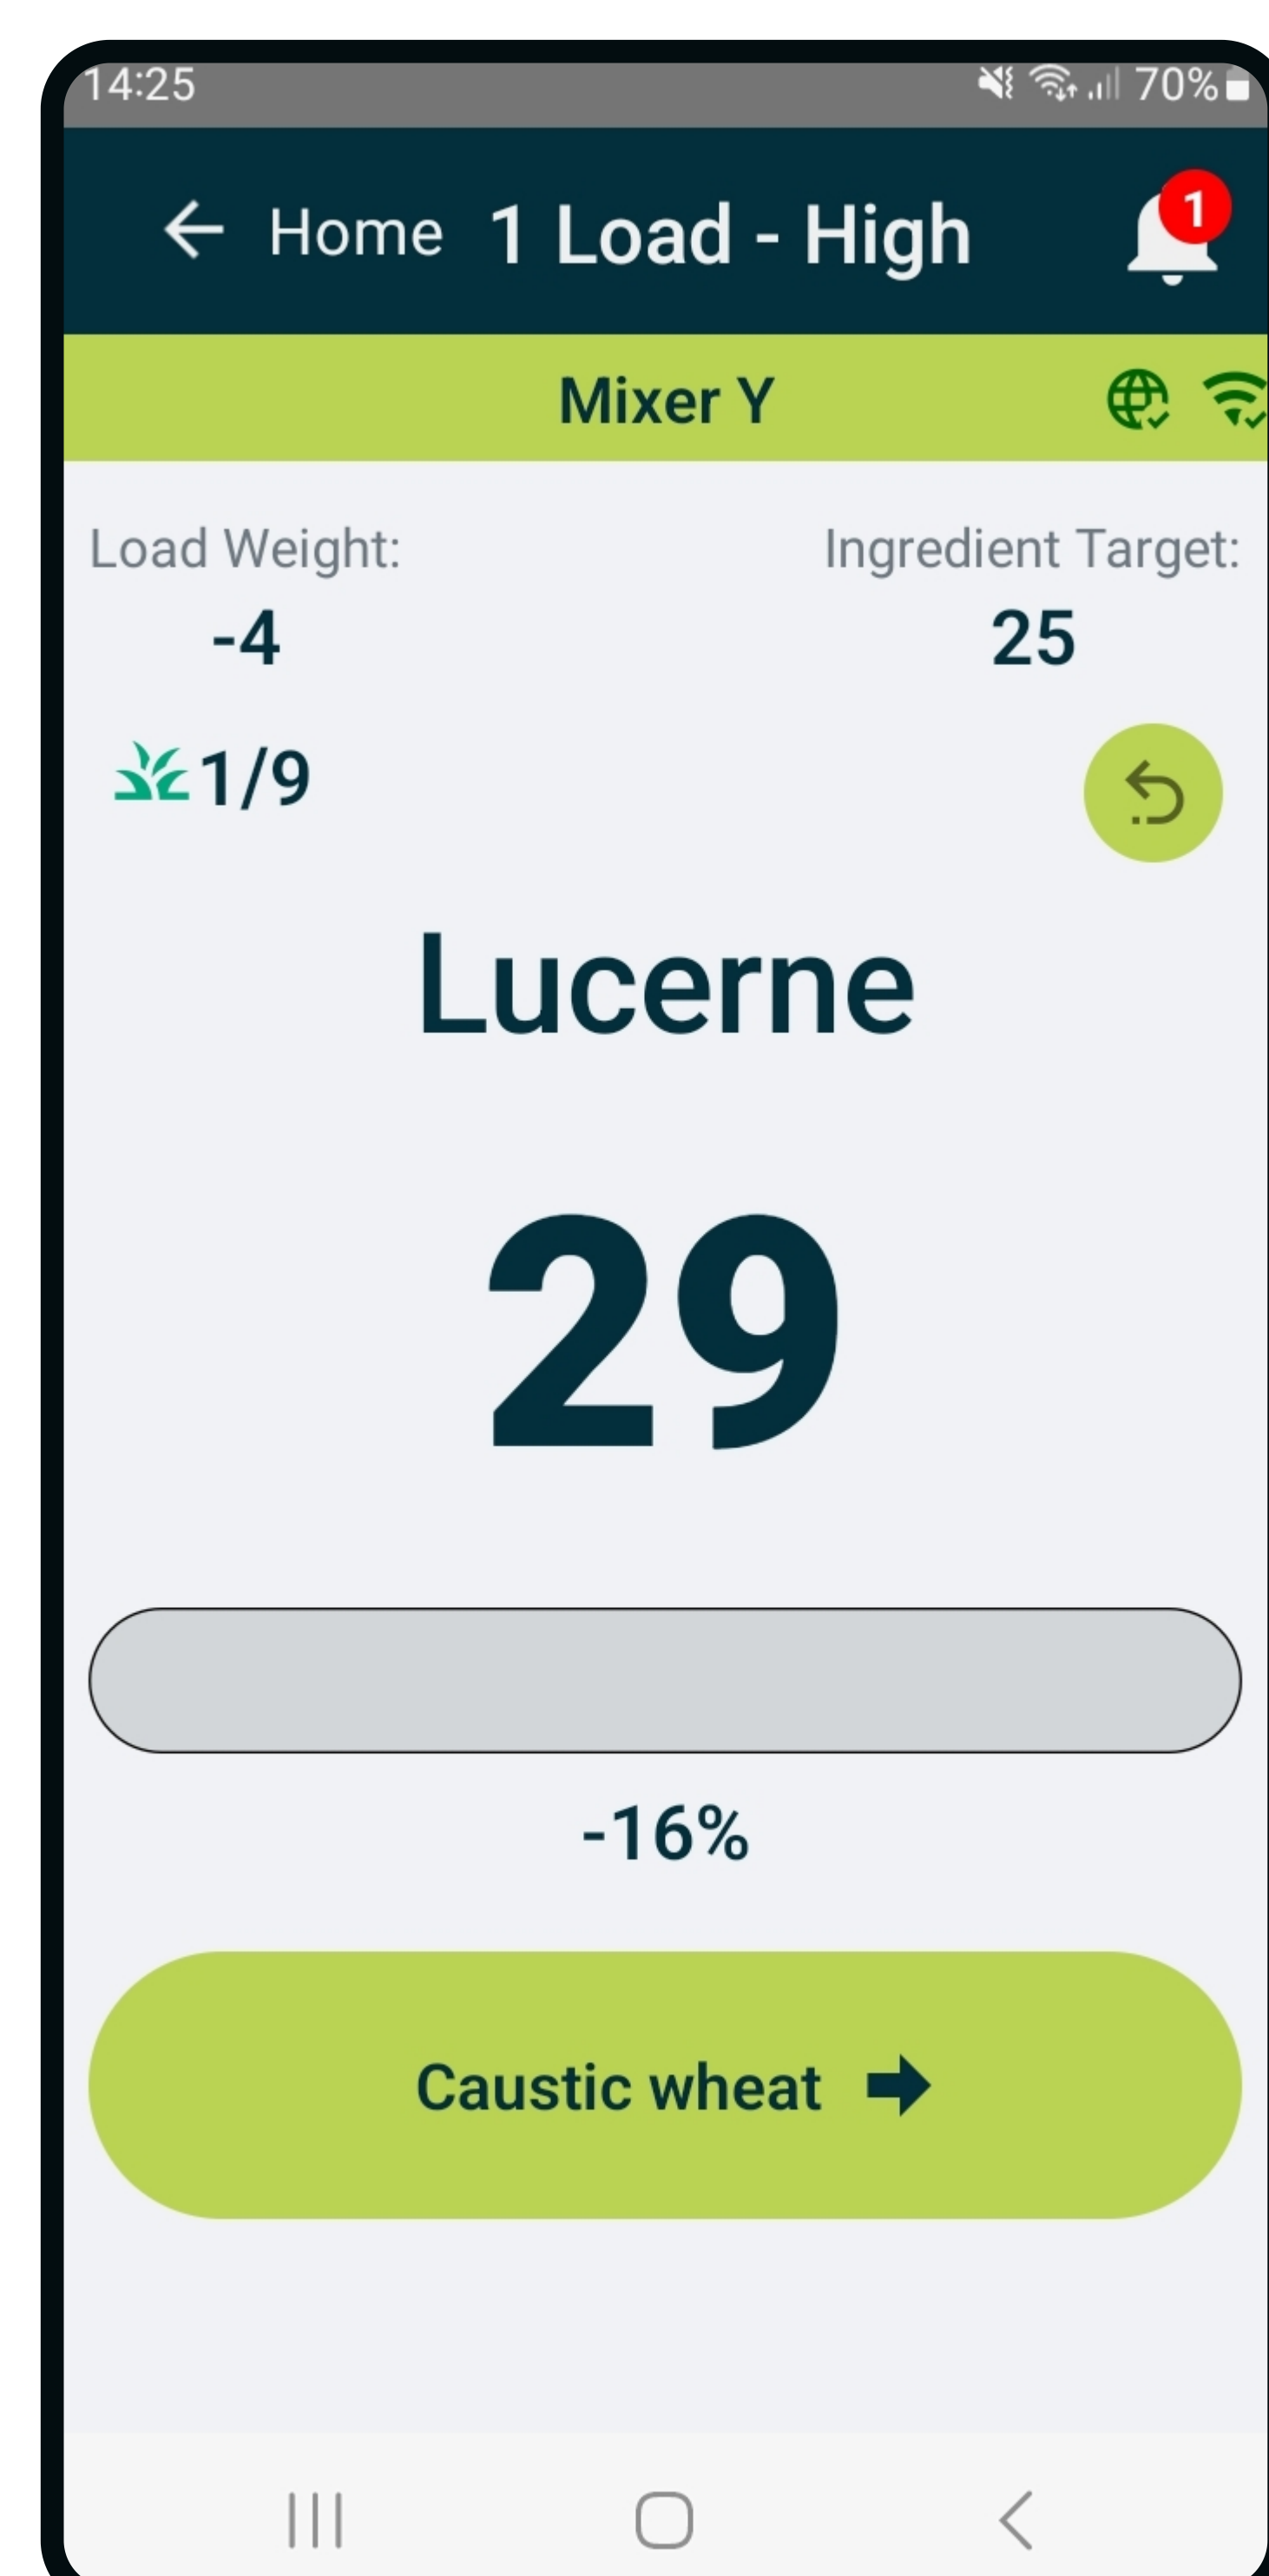

4. Press Start Load when ready to start the mix.

5. Choose the operator making the mix.

6. Ready to load the first ingredient.

## How to add an operator on mobile devices?

7. The name of the operator will be visible on other devices too.
